Amendments to the claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of claims:

- for increasing (currently amended) Α method 1. susceptibility of a cell to DNA-damaging agents, comprising antisense in vitro an introducing into the cell oligonucleotide that specifically hybridizes to a nucleic acid encoding a human DNA-dependent protein kinase subunit so as to prevent expression of the human DNA-dependent the subunit; wherein antisense kinase protein oligonucleotide is in an amount sufficient to increase the sensitivity of the cell to heat, chemical, or radiationinduced DNA damage; and wherein the human DNA-dependent protein kinase subunit is a human DNA-dependent protein kinase catalytic subunit, a Ku70, or a Ku80.
- 2. (original) The method of claim 1, wherein the antisense oligonucleotide is enclosed in a liposome prior to introduction into the cell.

3-14. (canceled)

15. (currently amended) An antisense oligonucleotide that specifically hybridizes to a nucleic acid encoding a <a href="https://www.numan.com/huma

dependent protein kinase catalytic subunit, or Ku70, so as to prevent expression of the \underline{human} DNA-dependent protein kinase subunit.

16. (previously presented) The antisense oligonucleotide of claim 15 linked to a ribozyme.

17. (canceled)

- 18. (currently amended) The antisense oligonucleotide of claim
 15 operably linked to a regulatory element.
- 19. (original) The antisense oligonucleotide of claim 18, wherein the regulatory element is an inducible promoter.
- 20. (original) The antisense oligonucleotide of claim 18, wherein the regulatory element is a heat shock promoter.
- 21. (original) An expression vector adapted for the expression of the antisense oligonucleotide of claim 15.
- 22. (previously presented) An expression vector adapted for the expression of the antisense oligonucleotide of claim 16.
- 23. (original) A pharmaceutical composition comprising the antisense oligonucleotide of claim 15 and a carrier.
- 24. (previously presented) A pharmaceutical composition comprising the antisense oligonucleotide of claim 16.

25-26. (canceled)
